+62 815-1181-6197 Semarang, Central Java

Profile

Fresh Graduate with a Bachelor's Degree in Informatics Engineering from Soegijapranata Catholic University who has a strong interest in Data Analytics, Machine Learning, and Web Development. Experienced in developing PHP & MySQL-based applications and building predictive models using Python. Capable of working individually or in a team and possesses a fast learning ability

Education

Bachelor of Informatics Engineering - Soegijapranata Catholic University
2022-2026 GPA : 3.25

Experiences

2021 (4 Months)| Data Analyst – PT Sohou Kikaku

Tech Stak: Microsoft Word, Microsoft Excel, SQL

- Responsible for managing incoming and outgoing documents, compiling daily target reports, and ensuring all administrative data is documented neatly through SQL (MariaDB) and is easily accessible in accordance with corporate standard operating procedures.
- Compiling daily and monthly administrative reports and coordinating with various divisions to ensure administrative needs are met accurately and on time.

2024 (6 Months)| FinTech – Chatbot FAQ Digital Payment

Tech Stak: Python, Flask, JSON, NLP

- Developed a FAQ chatbot application for digital payment service education.
- Built a question-and-answer system using a JSON-based FAQ dataset.
- Implemented Natural Language Processing (NLP) to understand user inquiries.
- Integrated the chatbot interface with a Python-based backend system.
- Conducted testing and evaluation of chatbot responses to improve answer accuracy.

2025 (6 Bulan)| Workshop – System Management Laundry

Tech Stak: HTML, CSS, MySQL, PHP

- Developed a web-based laundry application using PHP and MySQL.
- Designed and managed databases for customers, transactions, services, and transaction details.
- Implemented CRUD (Create, Read, Update, Delete) features for customer and transaction data.
- Developed an automatic calculation system for subtotal and total laundry costs.
- Created an automatic receipt printing feature.
- Integrated table relationships using JOIN in the MySQL database.

2025 - 2026| Project – Rice Production Preditcion Using LSTM, GRU, And BILSTM

Tech Stak: PyTorch, Python, Pandas, NumPy, Sckit-learn, Matplotlib

- Developed a national rice production prediction model using LSTM, GRU, and BiLSTM.
- Conducted time series data preprocessing (normalization and sliding window).
- Trained and compared the performance of the three models using PyTorch.
- Evaluated the models using MAE and RMSE metrics.
- Visualized prediction results and compared them with actual data.

Skill

Technical Skill

- MySQL
- PHP
- HTML
- Laravel
- Js
- NumPy
- SckitLearn
- Gitlab
- Web Develobment
- CSS
- Machine Learning
- Python
- Microsoft Word
- Microsoft Powerpoint
- Microsoft Excel

Soft Skill

- Teamwork
- Problem Solving
- Adaptability
- Comunication
- Time Management
